

AN IT PROJECT SURVIVAL GUIDE

FOR TECHIES AND NON-TECHIES WHO WANT TO SUCCEED TOGETHER

Who Should Attend

- Business Sponsors of IT projects
- End users who want their systems requirements fulfilled by IT
- Subject Matter Experts (SME) such as auditors, compliance and HR
- Technical roles will also gain a perspective on how to work productively with their non-technical community. I

We encourage participants to attend in tandem or as teams of IT and non-IT roles.

Do you feel that IT takes too long and costs too much? Do you understand your roles in software and systems projects? Do you lack the practices, language and instincts to make good decisions regarding IT? Is your organization falling behind or failing in your use of technology?

Without being overly technical, this webinar will help project sponsors, end-users and SME's to enable IT success by learning how to harness, leverage and enable IT methodologies, techniques and practices.

Workshop facilitator Harry Mingail (PMP, CBAP, PMI-PBA, LSS, Math/Comp Sci, Bus) brings 30 years of project management, business analysis, portfolio management and management consulting, is the author of several books, audios and videos

(see www.amazon.com) and has delivered more than 500 workshops to companies and universities in North America, Europe and Asia.
