

# Introduction to Lean Six Sigma

What can LSS do for you?

**\*Free 1 hour Webinar**

**October 14th**

**at 12 noon EST**

## About the Workshop

Lean Six Sigma is changing businesses around the globe through techniques and tools that translate directly into the bottom-line profits. With a constant push to reduce costs and provide products and services faster, there's no room for activities that don't add value to the customer. This 1 hour webinar gives you valuable insight to uncover and eliminate unnecessary activities that slow processes, create waste and add unnecessary cost, so you can focus more on activities that matter most to your customers.

### Who Should Attend:

- Team members,
- Human Resource Managers,
- Department Heads,
- Senior Management,
- Project, Program and Portfolio Managers and Directors.

Also ideal for teams in one department, project or corporation, who would like to transform their processes and organization.

### Course Objectives

- What is Lean Six Sigma – philosophy, history, tools
- Benefits of Lean
- Who is using Lean?
- Overview of the stages of Six Sigma - DMAIC
- Introduction to some of the tools commonly used in Lean and DMAIC projects
- What Lean Six Sigma means to your business?
- Begin your Lean Six Sigma journey and project selection

### Your Workshop Facilitator

David Bajurny (PMP, LSS, BI) has extensive management consulting and training experience serving all levels of the public sector (municipal, provincial, and federal) and private sector in the areas of technology, entertainment, automotive, financial, manufacturing, health, educational, communications, and resource driven industries. He has taken both lead and team roles in strategy, planning, project management, analysis, design, process improvement, implementation, support, maintenance, and training of custom client driven solutions. David is a certified PMP and Lean Six Sigma Specialist.
